About Bay Photo Lab

Bay Photo Lab has a long history of innovative photographic printing and photo finishing services. Located in the coastal redwoods outside of Santa Cruz, California, we have been providing Professional Photographers with the highest quality printing and customer service for over 40 years. We are committed to providing personal attention and a wide range of products. We pride ourselves on our quality printing and fast delivery.

Bay Photo was founded in 1976 - with the purpose of providing photographers with the finest possible services. We have kept that promise by changing and adapting with the photo industry. When digital technology began to gain momentum among professional photographers, Bay Photo was the first lab to implement the ROES online ordering system—now a standard for pro labs. Bay ROES continues to offer one of the most comprehensive selections of quality photo products available anywhere. In 2009, Bay Photo introduced **MetalPrints**: an exciting new art medium for printing photographs by infusing dyes directly into specially coated aluminum sheets. Prints up to 4'x8' along with custom sizes and shapes were introduced to photographers.

Bay Photo - Single MetalPrints

Uniquely durable print with vibrant colors, brilliant luminescent images, and exceptional detail.

MetalPrints™ represent a new art medium for preserving photos by infusing dyes directly into specially coated aluminum sheets. Because the image is infused into the surface and not on it, your images will take on an almost magical luminescence. The ultra-hard scratch-resistant surface is waterproof/weatherproof and can be cleaned easily – just avoid direct sunlight.

- Sizes: Any/Every Size From 2x3½" to 48x96", Including Custom Sizes
- Surfaces: High Gloss, Mid-Gloss, Satin, Sheer Glossy, & Sheer Matte
- Wall Display Options: Float Mount Hanger, Custom Framing, Exhibit Mount, Acrylic Face, Stainless Posts, Wall Clusters & Splits, and More
- Table Display Options: Metal Easel Back, Wood Easel, Bamboo Stand, or Acrylic Stand
- Corner Treatments: Sharp Square, 1/8" Rounded, 3/16" Rounded, & Scalloped
- How to Order: Bay ROES/MetalPrints Catalog or Online
- Production Time: 2-3 Business Days

Bay Photo - Framed MetalPrints

Enhance the beauty of your MetalPrint with a handcrafted Frame!

The vibrance, detail, and luminescence of photos printed on metal, along with their durability, makes them ideal for high-end gallery presentations.

The ultra-hard surface is scratch-resistant and can be cleaned easily with any commercial glass cleaner. To compliment this unique printing method, we offer a large selection of Metal and Wood Frames in a variety of colors and styles. Framed Metal Prints are perfectly finished without glass, and delivered display-ready with hanging hardware attached.

- Sizes: 5x5" to 48x96"
- Surfaces: High Gloss, Mid-Gloss, Satin, Sheer Glossy, & Sheer Matte
- Frame Styles: Wood, Metal, Barnwood, Rustic, Modern, Gallery, Flush, Inset, & Float
- Frame Mouldings: 61 Choices (Sample Sets available!)
- How to Order: Bay ROES/MetalPrints Catalog or Online
- Production Time: 5 Business Days

Bay Photo - Double Float MetalPrints

Double Float Metal Prints are a unique way to present your photos on metal.

A single MetalPrint is floated 1/2" off the surface of a second, larger MetalPrint, producing a contemporary 3 dimensional effect. The print in the back can be a photograph or design of your choice, which creates a 1" frame around the front MetalPrint. On sizes 16x20 and larger, the print in the back creates a 2" frame. Our Bay ROES Software makes it easy to build and visualize Double Float MetalPrints.

- Sizes: From 6x8" to 28x40" (Outside Dimension)
- Surfaces: High Gloss, Mid-Gloss, Satin, Sheer-Glossy, & Sheer-Matte, Individually Selectable for Both Prints
- Display Options: Hole in the Back for Easy Hanging, or Float Frame
- Corner Treatments: Sharp Square, 1/8" Rounded, 3/16" Rounded, & Scalloped
- How to Order: Bay ROES/MetalPrints Catalog
- Production Time: 2-3 Business Days

Bay Photo - Exhibit Mounts

An elegant look, wherever it goes.

MetalPrints are mounted on 2mm black Styrene and finished with a black Metal Inset Frame or Float Mount Hanger. Designed to look great while adding durability. Great for prints that are hung in highly trafficked areas or to prints that will be handled or transported frequently.

- Sizes: From 8x8" to 48x96"
- Finished Edges: Natural Aluminum or Black
- Hanging Options: Black Metal Inset Frame with French Cleat and Security Screw, Wire, or Float Mount Hanger
- Surfaces: High Gloss, Mid-Gloss, Satin, Sheer Glossy, or Sheer Matte
- How to Order: Bay ROES/MetalPrints Catalog or Online
- Production Time: 5 Business Days

Bay Photo - Creative Edge Metal Prints

What a way to display!

Creative Edge MetalPrints are the same stunning aluminum prints that you know and love, cut into our popular Creative Edge shapes. Available in a variety of shapes and sizes with optional Designer Borders.

- Sizes: 16 Choices, From 5x5" to 40x50"
- Surfaces: High Gloss, Mid-Gloss, Satin, Sheer Glossy, & Sheer Matte
- Features: 27 Shapes & Optional Designer Borders
- Display Options: 1/2" Float Mount Hanger
- How to Order: Bay ROES/MetalPrints Catalog or Online
- Production Time: 2-3 Business Days

11x14 \$54	40x60 \$730
16x20 \$90	48x72 \$1,185

Image Specifications

Images should be supplied at actual size plus 1/8" bleed at 300 dpi or higher resolution. Please maintain 1/8" bleed on all four sides to allow for trimming. For example, if you are ordering a 20"x30" OTWM print, your image should be supplied at the size of 20.125"x30.188", which gives the image a 1/8" bleed for trimming. All critical copy or important parts of the image along with artist's and photographer's signatures should be at least 1/4" from the 20"x30" final trim size (5/8" from bleed edge).

File Format

Adobe 98 and/or sRGB
Jpeg or non-compressed TIF

Aaron Brothers FAQ - Frequently Asked Questions

How large can I print a photo on Metal?

We offer: (5x7 @ \$25) (8x10 @ \$35) (11x14 @ \$45) (16x20 @ \$75) (20x30 @ \$135)

Does my image have to be a certain size or file type?

We accept several different file types including .jpg, .gif and .png. Images must be at least 150 dpi and file size cannot be larger than 300 MB to be printed.

Can you print my image without a frame?

Yes, we can print on paper, canvas, wood, acrylic, metal or glass – with or without a frame.

Do you offer float mounting?

We don't currently offer float mounting as a framing option.

When will I receive my order?

Most orders will arrive within 7-10 business days. Expedited orders arrive within 3-5 business days.

Can I expedite my order?

Orders can be expedited for an additional fee and arrive within 3-5 business days.

How much does shipping cost?

Shipping on all standard deliveries to the 48 contiguous states is free. Additional rates apply for delivery to Alaska and Hawaii and will be reflected at checkout.

Where do you ship?

We currently ship within the 50 U.S. states and don't offer shipping to U.S. territories or other countries. Shipping to any one of the 1,200 Michaels stores is also available to pick up your order.

How can I track my order?

Orders can be tracked one of three ways – by using the "track my order" link at the bottom of any page, logging into your account or by clicking on the tracking number received in your ship-confirmation email.

If I order online, how long will it take for my finished piece to be delivered?

Once they receive your art, our designers will need 7 – 10 days to complete your order. If you choose standard delivery, your order will arrive 7 – 10 days after completion.

Large Metal Prints

<https://www.largemetalprints.com>

3345 Vincent Rd., Pleasant Hill, CA 94523

jon@largemetalprints.com

LARGE METAL PRINTS is a family run business that has been creating breathtaking metal prints since 2010. Our business philosophy goes back 30 years with generations emphasizing the importance of customer care. Our one-on-one approach with our customers assures a long lasting partnership which is critical to bringing you the very best metal prints on the market. Every customer is encouraged to reach out and develop this type of relationship. We sincerely look forward to printing your wonderful photos on metal, but more importantly developing a long lasting business relationship with you.

The image shows a screenshot of the Large Metal Prints website homepage. At the top, there is a navigation bar with links for HOME, HOW TO ORDER, PRICES & MEMBERS, RETAIL GALLERY, PRICE LIST, METAL FOR SALE, and ABOUT US. A 'LOG IN' button is also present. The main heading is 'LARGE METAL PRINTS' with the tagline 'METAL PRINTING PERFECTED'. Below this, it states 'HIGHEST QUALITY MATERIALS UNMATCHED CUSTOMER SERVICE COMPETITIVE PRICES'. A prominent blue button reads 'NEW RETAIL PHOTO GALLERY'. The central feature is a photograph of a man in a black shirt pointing at a large metal print of the Golden Gate Bridge. To the right of the photo is a testimonial: 'I've tried them all and NOTHING compares to the quality that LARGE METAL PRINTS delivers! They are second-to-none.' Below the testimonial is the name 'Nancy Heston' and the date '1/24/2014'. At the bottom of the page, the text reads 'Large Metal Prints for Beauty, Durability and Excellence in Customer Service'.

FINISHES

**All prints are pressed using the sublimation process, where the ink is heat pressed into the coating of our metal, not just printed on the surface, promising longevity for your Metal Print.*

WHITE GLOSS- By far our most popular. This finish provides amazing color depth and luminosity. Gloss is an excellent finish for any subject, especially landscapes, sports action photos, and digital art. Rich vibrant colors glow on this unique surface.

WHITE SEMI-GLOSS - This finish bridges the gap perfectly between Gloss and Matte. It has the same qualities in color depth as the gloss, and has a touch more luminosity than the matte. This finish is less reflective than gloss which is ideal for heavily lit areas where glare can be a concern.

WHITE MATTE - Best for portrait work, weddings, black & whites, or anytime surface reflection is a concern. This surface provides a rich, smooth finish where colors come alive in a more subtle way than the gloss.

SILVER- Silver metal comes in three finishes (**Gloss, Semi-gloss, and Matte**) similar to White metal. Silver metal is used when you want a more metallic look to your image. It is always recommended to get a sample of your image on silver to see if it's right for you.

Heat Presses \$11,995-\$17,995

The new 42" and the 64" heat presses are the ideal presses for production oriented businesses. Whether you want to proof out your newest designs on fabric, or create a masterpiece on metal, these heat presses will do it all! The dual controllers, combined with the close-spaced heating coils, make this heat press unparalleled when it comes to even heat distribution which is a must for metal printing. *Manufactured by Large Metal Prints in California.* **Call us for more information today.**

Looks to be a full service lab for scanning, printing conventional paper prints. They provide little information regarding the production of metal prints, although their web presence shows lots of facility photos. Not sure about metal prints.

Their metal prints are printed on Chromaluxe Aluminum panels. They utilize www.wetransfer.com for file uploads which is the same service used by Bay Photo. This could be an indication that they are a "store-front" for Bay Photo wherein they utilize BP as a fulfillment provider.

Google Map with lots of photos:

Chromaluxe - Manufacturer and supplier of aluminum plates for creating metal prints

<https://www.chromaluxe.com>

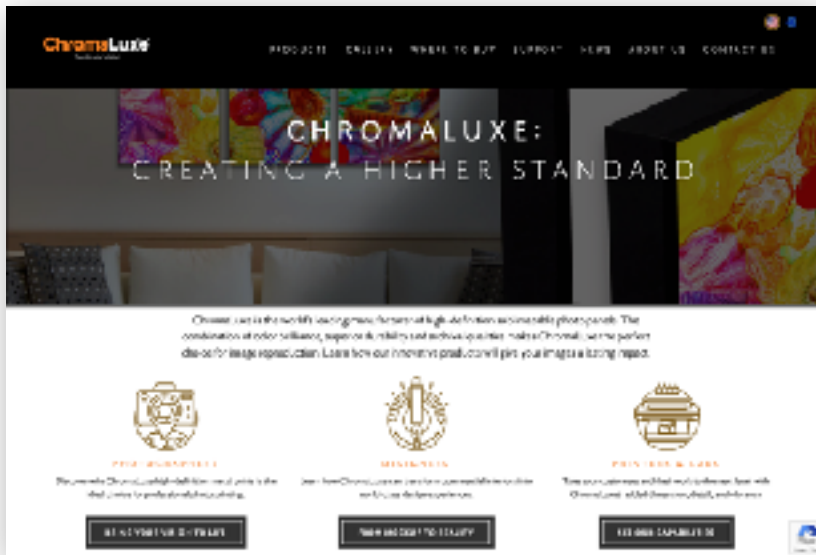

ChromaLuxe is the world's leading manufacturer of high-definition sublimatable photo panels. The combination of color brilliance, superior durability and archival qualities makes ChromaLuxe the perfect choice for image reproduction.

ChromaLuxe is committed to the responsible use of environmental resources, in fact, environmental sustainability is an integral part of our business model. We have chosen to be an environmentally friendly organization for both ethical and economic reasons. From the use of recycled materials in the manufacturing of our products to workplace recycling and green initiatives, ChromaLuxe has developed a culture of environmental stewardship.

How to produce a Metal Print YouTube Video: https://www.youtube.com/watch?time_continue=29&v=TZLBc77zEQE

YouTube Video - 3min no voice - <https://www.youtube.com/watch?v=UCh4gkFfOf8>

Lexjet Chromaluxe Demo - <https://www.youtube.com/watch?v=im1qG0V5zRg>

Chromaluxe - *Unmatched quality. Comments from their website.*

“At ChromaLuxe, we’ve perfected our manufacturing process to create the highest quality photographic product available in the market today. We coat our aluminum plates with a very fine multiple layer polymer finish. Our photo panels contain a specialized, formulated coating that provides the foundation for a visually stunning and durable image.

“The first time people see ChromaLuxe High-Definition Metal Prints they are blown away by the quality and depth of the image. Our High-Definition Metal Prints are not only stunning to look at, but the durability of this product is unmatched by competitors.

“When it comes to fade resistance, the world’s best known photographers, galleries, and museums trust their work to ChromaLuxe. ChromaLuxe’s archival qualities, image brilliance, and durability set it apart from all other photo print mediums. To learn about ChromaLuxe’s fade qualities and more, please [VISIT OUR FADE REPORTS PAGE](#).

“ChromaLuxe’s superior archival qualities provide the peace-of-mind that your images will be enjoyed for generations to come.

“Wilhelm Imaging Research, the world’s leading authority on print permanence, carried out extensive testing on ChromaLuxe metal panels. Results of the testing determined that ChromaLuxe metal prints will last more than three times longer than silver-halide photographic paper prints that have been framed under glass. Full testing results and more can be seen at the links below.”

WHAT IS DYE SUBLIMATION?

- In the hard surface dye sublimation industry, an image is printed onto dye sublimation transfer paper using dye-based inks and then transferred onto a specially coated surface with heat and pressure. The result is stunning with vibrant color and a unique dimensional quality.

HOW SHOULD CHROMALUXE PRINTS BE CLEANED?

- Unlike other photo print media, ChromaLuxe metal prints are easy to clean. The metal prints can be cleaned with a cloth and any all-purpose household cleaner. The cleaner can be sprayed directly on the surface of the print and then wiped with a cloth as needed.

HOW LONG WILL CHROMALUXE METAL PRINTS LAST?

- ChromaLuxe metal prints were tested by Wilhelm Imaging Research and achieved a permanence rating of more than 60 years using two distinct ink sets. This rating is more than three times better than silver halide photo papers.

Chromalux FAQ - Continued

CAN CHROMALUXE PRINTS BE USED OUTDOORS?

- ChromaLuxe aluminum and wood panels are not for permanent outdoor display. Any prints displayed outdoors will result in faster than normal fade.
- Our line of ChromaLuxe EXT is designed for outdoor use. It lasts outdoors 2 years* for photography and 3 years* for signage based art. *With approved ink sets.

WHAT IS THE BEST WAY TO HANG CHROMALUXE PRINTS?

- There are a variety of options that allow you to hang your print. Check with your supplier to see what they recommend for your size print.

ALUMINUM PHOTO PANELS

Aluminum that we purchase is both created by pre and post-consumer recycled material and is recyclable. This is important because material is diverted from the waste stream through the recycling infrastructure and can be used for other products.

Our aluminum supplier is GreenCircle Certified: GreenCircle certifies environmental claims of products to prevent unfair or deceptive claims in the marketplace; our aluminum supplier has been audited by a 3rd party organization to confirm their recyclable claims. [ALERIS ROLLED PRODUCTS, LLC. GREEN CIRCLE CERTIFICATION](#)

Material can be recycled.

ALUMINUM

ChromaLuxe metal prints are the perfect High-Definition medium for displaying artwork and photography.

Fade Resistant - The latest fade testing shows that our prints will last a lifetime with resistance to yellowing and climate damage.

Moisture Resistant - Our specialty coated prints are resistant to moisture, making them the perfect choice for any environment.

Chemical Resistant - The chemical resistant aluminum surfaces can be cleaned with ammonia, bleach, acetone or any all-purpose cleaners.

Scratch and Abrasion Resistant - Unique substrates and coatings provide incredible scratch and abrasion resistance.

OUR COATINGS

- The coating that is applied to the substrates contains no lead or other heavy metals or phthalates. This coating is a thin, very durable film which is cured using a low energy process creating no emissions from the facility.
- Contain no VOCs (Volatile Organic Compounds).

ALUMINUM - WHITE BASE METAL PRINTS (INTERIOR)

ChromaLuxe EXT photo panels come in one finish: GLOSS WHITE

Best Blanks

Sublimation ink is unique in its ability to convert from a solid to a gas without going through a liquid form. (Just like dry ice.) The conversion is initiated by heat and controlled with pressure and time. Hard items such as ceramic, fiber board, metals, etc. requires a special coating to accept the sublimation inks.
